SOORYA M

Junior Cloud Engineer | AWS Cloud & DevOps

Chennai, Tamil Nadu, India | 9843729832 | sooryamathanagopal07@gmail.com

GitHub: github.com/soorya079 | LinkedIn: linkedin.com/in/sooryam-9835bb362

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience deploying and monitoring applications on AWS, including Amazon ECS Fargate, ECR, CloudWatch, EventBridge, Lambda, S3, and IAM. Skilled in Docker containerization, AWS CLI, CI/CD with GitHub Actions, and cloud troubleshooting, with working knowledge of Linux and networking fundamentals. Seeking an entry-level Cloud/DevOps Engineer role to apply practical AWS deployment and monitoring experience.

TECHNICAL SKILLS

Cloud & AWS: Amazon S3, AWS Lambda, API Gateway, IAM, Amazon ECR, Amazon ECS Fargate, CloudWatch, EventBridge, SNS, S3 Presigned URLs

DevOps & Tools: Docker, AWS CLI, Git, GitHub, GitHub Actions, VS Code, Postman

Programming: Python, Java, JavaScript, C

Networking: CCNA Fundamentals, OSI Model, TCP/IP, DNS, LAN/WAN, Routing & Switching

Web & Backend: HTML5, CSS3, JavaScript, React, Node.js, Express.js, REST APIs

Databases & Systems: MySQL, MongoDB, Firebase, Linux, Windows

PROFESSIONAL EXPERIENCE

Cloud Engineer — Bdreamz Global Solutions, Chennai *6 Months | Completed Sep 2026*

- Worked with core AWS cloud services to support application deployment and infrastructure tasks.
- Assisted in deploying and managing containerized applications using Docker on AWS cloud infrastructure.
- Used AWS CLI to configure, manage, and troubleshoot cloud resources and deployment workflows.
- Supported application monitoring and logging activities to help identify and resolve cloud infrastructure issues.
- Followed basic DevOps practices to assist in streamlining deployment and operational workflows.

CLOUD PROJECTS

CloudSentinel — AWS DevSecOps Self-Healing Platform

Python, FastAPI, Docker, Amazon ECR, Amazon ECS Fargate, CloudWatch, EventBridge, Lambda, SNS, GitHub Actions, AWS CLI

- Built and containerized a Python/FastAPI application using Docker.
- Built and pushed the Docker image to Amazon ECR.
- Deployed the containerized application using Amazon ECS Fargate.
- Configured AWS networking and security access required for deployment.
- Used CloudWatch for application and container monitoring and logging.
- Implemented incident detection and automated recovery concepts using EventBridge and Lambda.
- Used SNS for operational alerting.
- Used GitHub Actions for CI/CD workflow automation.

CloudVault — AWS Cloud File Management System

- Built a cloud-based file management application using Amazon S3 for scalable object storage, with AWS Lambda powering serverless backend processing and API Gateway handling API communication.
- Configured IAM roles and policies to manage secure AWS permissions and access control across application components.
- Implemented S3 presigned URLs for controlled, time-limited file upload/download without exposing AWS credentials, alongside authentication for secure access.
- Resolved CORS configuration issues and debugged API and cloud integration problems using Python.

Python Network Monitor

- Developed a Python-based network monitoring tool using Flask to track and analyze network and system behavior.
- Applied core networking concepts to identify and monitor network activity and performance patterns.
- Conducted testing and debugging to ensure reliable monitoring and accurate troubleshooting of network issues.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering, National Engineering College *Sep 2023 – May 2026*

Diploma in Mechanical Engineering, Lakshmi Ammal Polytechnic College *Jun 2020 – May 2023*

CERTIFICATIONS & LEARNING

- CCNA / Networking Fundamentals — Completed
- Python — Completed
- AWS Cloud Computing — Completed
- DevOps — Ongoing | Linux — Ongoing

Languages: Tamil, English
