Soorya M

AWS CLOUD ENGINEER | DEVOPS ENGINEER

Chennai, Tamil Nadu, India | 9843729832 | sooryamathanagopal07@gmail.com
LinkedIn | GitHub |

PROFESSIONAL SUMMARY

Entry-level AWS Cloud Engineer and Junior DevOps candidate with hands-on experience deploying containerized Python/FastAPI applications on Amazon ECS Fargate, building serverless and event-driven systems with AWS Lambda, API Gateway, DynamoDB and EventBridge, and defining infrastructure as code with AWS SAM and CloudFormation. Comfortable with Docker, AWS CLI, CloudWatch monitoring and troubleshooting, and AWS networking and security groups, backed by CCNA networking fundamentals. Completed a six-month Cloud Engineer internship and seeking Junior AWS Cloud Engineer, Associate Cloud Engineer, Junior DevOps Engineer or Cloud Support Engineer roles.

TECHNICAL SKILLS

AWS Cloud Services: Amazon ECS, AWS Fargate, Amazon ECR, AWS Lambda, Amazon API Gateway, Amazon DynamoDB, Amazon S3, Amazon EventBridge, Amazon CloudWatch, AWS IAM, VPC and Security Groups
DevOps and Infrastructure as Code: Docker, AWS CLI, AWS SAM, AWS CloudFormation, Git, GitHub, CI/CD Fundamentals
Programming and Backend: Python, FastAPI, REST APIs
Frontend: React
Networking and Operating Systems: Networking Fundamentals, Linux Fundamentals, CCNA Networking Concepts

PROFESSIONAL EXPERIENCE

Cloud Engineer Intern – Bdreams Global Solutions, Chennai
Six-month internship, completed September 2026

- Built and containerized a Python/FastAPI backend service using Docker.
- Created an Amazon ECR repository and pushed the Docker image for deployment.
- Deployed the containerized application on Amazon ECS with AWS Fargate.
- Worked with AWS VPC, subnets, security groups and container networking to enable application access.
- Used Amazon CloudWatch logs and AWS CLI to inspect deployments and troubleshoot application issues.
- Gained hands-on practice in AWS resource configuration, deployment and troubleshooting.

PROJECTS

CloudSentinel – AWS Cloud Deployment and Recovery Project
Technologies: Python, FastAPI, Docker, Amazon ECR, Amazon ECS Fargate, Amazon CloudWatch, Amazon EventBridge, AWS Lambda, Amazon SNS

- Containerized a Python/FastAPI backend service using Docker and published the image to Amazon ECR.
- Deployed the containerized application on Amazon ECS Fargate, configuring networking and security groups to enable application access.
- Used CloudWatch logs and AWS CLI to monitor deployment status and troubleshoot runtime issues.
- Designed an event-driven recovery and alerting workflow using Amazon EventBridge, AWS Lambda and Amazon SNS.

LIFEGRID – Event-Driven Disaster Coordination Platform
Technologies: AWS Lambda, Amazon API Gateway, Amazon DynamoDB, Amazon EventBridge, Amazon CloudWatch, AWS IAM, AWS SAM, AWS CloudFormation, Python, FastAPI, React

- Developed a serverless disaster coordination platform using AWS Lambda, API Gateway and DynamoDB to manage simulated disaster reports and resource information.
- Implemented event-driven processing with Amazon EventBridge for asynchronous risk assessment and resource-shortage detection workflows.
- Designed idempotent event processing to prevent duplicate event handling and maintain consistent application state.
- Deployed backend infrastructure using AWS SAM and CloudFormation, with CloudWatch for logging and troubleshooting.
- Built a React dashboard to visualize disaster reports, risk assessments and resource availability using simulated data.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering
National Engineering College | Graduated May 2026

Diploma in Mechanical Engineering(D.M.E.)
Lakshmi Ammal Polytechnic College | Graduated May 2023

CERTIFICATIONS

- CCNA – Completed
- AWS-Completed
- Python- Completed
- Devops- OnGoing
- Linux- OnGoing

Languages

- Tamil
- English
